BREAST CANCER CARE & PREVENTION

Dedicated to providing the latest cancer treatments and preventive guidance in a comfortable and caring setting.

The professionals at Community Cancer Care & Prevention work together to plan each patient's care, to follow through with the best treatment protocols, and to carefully monitor progress. Collaboration with primary care providers and other specialists allows for a personalized multidisciplinary approach to each person's care. We also provide breast health and oncology nurse navigators to help guide patients through their cancer diagnosis and treatment.

Our high-risk breast cancer screening and genetics education programs offer patients a personal assessment of lifetime cancer risk, surveillance recommendations and appropriate genetic testing and counseling.

Services:

- Breast Cancer Screening for High-Risk Patients
- Genetic Testing & Counseling
- Cancer Treatments: Medical and Radiation Oncology
- Coordination of Care with all Medical Providers
- Nurse Navigators
- Palliative Care
- Education Resources
- Financial Resources Assistance
